

# FIAT FIORINO COMBI SLIDING BULKHEAD

## FIAT FIORINO COMBI

Snoeks Automotive B.V., the crew van specialist for Europe has developed a sliding bulkhead especially for the Fiat Fiorino Combi.

By adding a mesh grill sliding bulkhead to the foldable second seat row, it is possible to adjust your Combi into a panel van in a safe manner at all times. The perfect solution for the combined transport of people and material. Safe, comfortable and efficient.

Obviously the bulkhead mesh grill applies to the highest European safety standards. The construction is designed to meet the ISO/BS 27956 standard for load shifting protection. The integral height adjustable and tilting headrests are fully M1 tested.

Design also plays an important role when Snoeks develops a double cabin. Materials and shapes are as close to OE-design as possible, including floor, side wall covers and headlining. The fine designed partition wall separates load and passenger compartment.

The conversion comes with;

- Mesh grill sliding bulkhead
- Integrated headrests
- Additional lashing eyes
- High quality ply finishing
- Ply wheelboxes
